<b>MITIGATION UPDATE</b>									
The mitigation									
These average mitigation rates were determined by itemizing costs for a typical run (from the time a fire apparatus leaves the station until it returns to the station) and are based on the actual costs, using amortized schedules for apparatus (including useful life, equipment, repairs, and maintenance) and department's "actual personnel expense." The actual personnel expense includes costs such as total salary & benefits.

NOTES With the new Measure J funding allocation voted on by WCCTAC, the City of Richmond could be getting more funding. If there is a substantial amount of funding, it would be used to provide later, after hours, and weekend service which has been a request by the community. The proposed farebox fee would prepare Paratransit in the event there is more funding.

**Commuter Benefit Ordinance**

\* The annual base flat permit fee for a metered space is calculated as the average gross revenue per meter during the most recent completed fiscal year.

\*\*The annual base flat permit fee for vehicles at a time zone(non-metered) space is \$40 multiplied by 12 months.

The annual base flat permit fee of a dedicated space for a gas-powered car share vehicle is the annual base permit fee for metered spaces and annual base permit fee for time zone (non-metered) space, when parked at those respective spaces.

The annual permit fee of a dedicated space for a zero emission powered (ZEV) car share vehicle is based on a 25% discount off the annual base permit fee for metered spaces and a 25% discount off the annual base fee for time zone (non-metered) spaces (i.e., equal to 75% of the annual base permit fee).
