

CITY OF RICHMOND - CARLSON BOULEVARD CROSTOWN CONNECTION

This project is made possible by a \$500,000 grant from the Safe Routes to Transit program. The project will improve the built environment for pedestrians and bicyclists, making Carlson Blvd a safer and more enjoyable route to access AC Transit line 71, El Cerrito Plaza BART, and the Richmond Intermodal Station. The project was one of two that were identified and approved by Council along with the Bicycle Master Plan in November 2011, and received a Mitigated Negative Declaration
